Dear Valued Customer:

GE Industrial Solutions is committed to be a market leader in supplying products sold by its businesses throughout the world. We have put in place strong programs to comply with regulations in all countries in which we do business. Our approach to REACH (Regulation 1907/2006 on the Registration, Evaluation, Authorization and Restriction of Chemicals adopted by the European Union in December 2006) is being addressed in the same rigorous manner.

GE Industrial Solutions has been closely following the legislative development of REACH. We are working with our suppliers to identify any potential implications of REACH on the availability of materials. The vast majority of GE Energy Management products including accessories and packaging are considered "articles" under REACH. A candidate list pursuant to Article 59 of REACH has been published by ECHA at http://echa.europa.eu/chem_data_en.asp. Based on an initial review, Industrial Solutions has no currently available information that goods supplied for our Electrical Distribution products contain a Candidate List Substance above a concentration of 0.1% weight by weight of the article(s) supplied as of the latest submission of REACH substances dated December 2013. As we find substances that exceed the maximum concentration level at the article, we have implemented a process of notification as required in the REACH Directive (EC) No 1907/2006.

If you have a question regarding a specific product please do not hesitate to contact:
