

# SAFETY DATA SHEETS (SDS) AND LIGHTING PRODUCTS

## **GHS: Safety Data Sheets are not applicable for LEDVANCE Lighting products**

GHS refers to the United Nations (UN) Globally Harmonized System of Classification and Labelling of Chemicals. The GHS establishes new rules for hazardous chemicals in transportation, workplace use and consumer use, as well as special rules for pesticides. GHS also includes new Material Safety Data Sheet (MSDS), or Safety Data Sheet (SDS), requirements and new hazard symbols. It comprises standards for:

- Classifying chemicals
- Symbols for hazards
- Labelling requirements
- Material Safety Data Sheet requirements

The GHS applies to pure chemical substances, their dilute solutions and to mixtures of chemical substances. "Articles" as defined in the Hazard Communication Standard (29 CFR 1910.1200) of the US Occupational Safety and Health Administration, or by similar definition, are outside the scope of the system.

"Article" means a manufactured item other than a fluid or particle:

- (i) which is formed to a specific shape or design during manufacture;
- (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and
- (iii) which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical and does not pose a physical hazard or health risk to employees.

LEDVANCE lamps and luminaires meet the requirements of an "Article" as defined above. Therefore a Safety Data Sheet is not applicable for our products.

LEDVANCE contact address
